## DETAILED ACTION

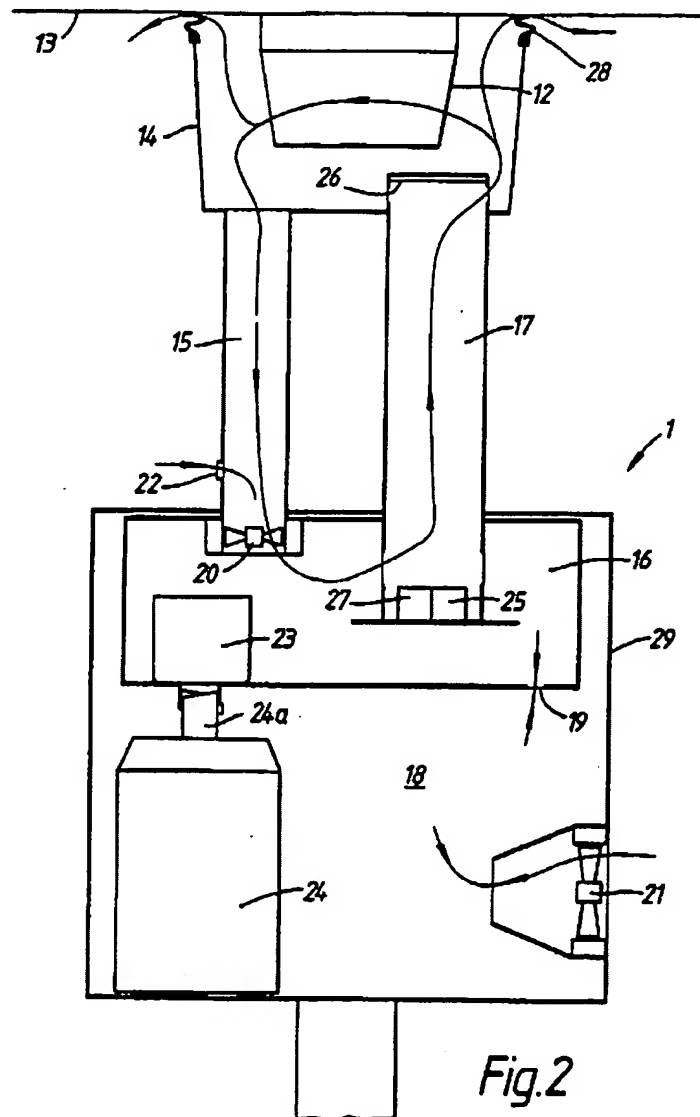

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Allowable Subject Matter*

2. Claims 1-11 are allowed over the Prior Art of record.
3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is the inclusion of the apparatus and method step limitations of the combination of a single-piece adapter for supplying a gas to a detector (i.e. smoke, toxic, hazardous, CO, H<sub>2</sub>S, etc.) that contains *at least one sensor that has a gas inlet* (emphasis added) allowing the gas to enter and come in contact with the sensor; the adapter having a chamber having an inner surface, *an inlet duct for feeding gas in a direction transverse to the opening* (emphasis added); and outlet to vent gas from the chamber; wherein the inner surfaces of the chamber *having first and second mouldings*, (emphasis added) where the *first is a non-absorbant, rigid material, and the second is a resilient material that forms the part of the surfaces surrounding the opening to the sensor* (emphasis added).
4. None of the Prior Art teach the combination along with all of the above limitations. Typically, the Prior Art tends to completely 'seal' the detector/detecting device, without having any inlets or outlets, much less having the particular sealing arrangement and mouldings recited.

The closest Prior Art reference is US 5,670,946 to Ellwood et al., which discloses a similar apparatus and method (see Fig. 2), however, there are no limitations/teachings of inlets or outlets or direct sealing above an opening for a sensor.

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

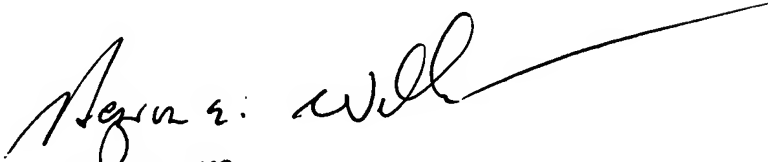

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is invited to review PTO form 892 accompanying this Office Action listing Prior Art relevant to the instant invention cited by the Examiner.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fitzgerald whose telephone number is (571) 272-2843.
